Document Purpose	Guidance
Document Name	General Practice Resilience Programme
Author	NHS England/ Medical/ Primary Care Commissioning
Publication Date	July 2018
Target Audience	CCG Clinical Leaders, CCG Accountable Officers, NHS England Regional Directors, NHS England Directors of Commissioning Operations, Communications Leads, Heads or Primary Care
Additional Circulation List	CCG Clinical Leaders, CSU Managing Directors, Heads or Primary Care, NHS England Regional Directors, NHS England Directors of Commissioning Operations, Communications Leads
Description	This guidance describes how the General Practice Resilience Programme (GPFV) will operate to deliver the commitment set out in the General Practice Forward view. This programme aims to deliver a menu of support that will help practices to become more sustainable and resilient, better placed to tackle the challenges they face now and into the future, and securing continuing high quality care for patients.

1 Version Control

This guidance is updated each year and this is the third version. This section outlines the changes made to this version.

- 1. Inclusion of case studies as a reporting requirement (following a pilot in 2017/18)
- 2. Clarification included to note that funding should be allocated where there is greatest need (and not simply divided up equally among CCGs / practices)
- 3. Addition of reference to changing structures such Integrated Care Systems (ICSs)
- 4. Reference to the need to take a more strategic approach to ensure transformational change building sustainable support through primary care networks.
- 5. Plain English proof-read
- 6. Draft document shared with a group of resilience leads nationally and comments incorporated
- 7. Draft document shared with Finance and section updated accordingly
- 8. Updated MoU to recognise practices' commitment to provide case studies as appropriate.

2 Summary

This guidance document describes how the General Practice Resilience Programme (GPRP) will run in 2018-19. The GPRP is one part of the commitments made in the General Practice Forward View¹ to invest £40m over four years (ending 2019/20) to support struggling practices.

The GPRP aims to deliver support that will help practices to become more sustainable and resilient, better placed to tackle the challenges they face now and into the future, and secure continuing high quality care for patients.

The intended audience for this guidance is:

- NHS England regional teams working under Directors of Commissioning Operations who lead delivery of this programme
- Clinical Commissioning Groups, local provider GPs and their Local Medical Committee (LMC) representatives, and Royal College of GPs (RCGP) Faculties and Regional Ambassadors who work in close collaboration with regional teams to support this programme
- Greater Manchester Health & Social Care Partnership (GMHSCP).

Promoting equality and addressing health inequalities are at the heart of NHS England's values. Throughout the development of the policies and processes cited in this document, we have:

- Given due regard to the need to eliminate discrimination, harassment and victimisation, to advance equality of opportunity, and to foster good relations between people who share a relevant protected characteristic (as cited under the Equality Act 2010) and those who do not share it; and
- Given regard to the need to reduce inequalities between patients in access to, and outcomes from healthcare services and to ensure services are provided in an integrated way where this might reduce health inequalities.

Changes in 2018-19

This guidance was refreshed following the first year of delivery (16-17). It has been refreshed again for 2018-19.

_

¹ https://www.england.nhs.uk/gp/gpfv

3 Introduction

Rising GP workload pressures are widely recognised in England. Managing GP services that are at or beyond capacity risks locking those practices into responding reactively and inhibits effective strategic leadership and practice management. Recruitment challenges exacerbate these difficulties. In addition, practices do not exist in isolation and the impact of these pressures can have a 'domino effect' in local areas. One or two local problems can quickly impact on otherwise functioning and stable practices.

NHS England is committed to supporting GP practices to improve their sustainability and resilience, securing operational stability, developing more effective ways of working, and working towards future sustainability including, if appropriate, helping practices to explore new care models.

In addition to the GPRP, two national programmes were also in operation offering turnaround support to GP practices in difficulty:

- In 2016/17: £10m investment in externally facilitated support the Vulnerable Practice Programme² (the Vulnerable Practice Programme ended in March 2017 with over £10m invested in diagnostic and improvement support to 714 GP practices) and.
- In 2016/17 extended until October 2017: RCGP Peer Support Programme³ providing support to practices entering CQC special measures following first wave of inspections

NHS England worked with the RCGP, British Medical Association (BMA) General Practitioners Committee (GPC) and NHS Clinical Commissioners (NHS CC) to consider how best to offer support through the design of the GPRP, following its first year of implementation (2016/17). In the second year of funding (2017/18) incremental improvements were made following feedback from resilience leads.

This guidance sets out how the GPRP will be delivered in 2018-19 and confirms:

- Operational and funding arrangements at NHS England regional and Direct Commissioning Organisation (DCO) level
- Practices (individual or groups (e.g. through Primary Care Networks or Hubs)) will be identified for support using existing national criteria
- A menu of support will be offered by regional teams, ranging from support to stabilise practice operations where avoiding closure is the preferred option, through to more transformational support that will secure resilience in to the future
- Regional teams will tailor this support and decide how to deliver this in view of local practice needs working in conjunction with CCGs, provider GPs, LMCs representatives, Sustainability and Transformation Partnerships (STPs) and Integrated Care Systems (ICSs) – as developed, RCGP Faculties and Regional Ambassadors (referred hereafter as 'key partners').

² https://www.england.nhs.uk/wp-content/uploads/2015/12/letter-support-vulnerable-gps-final-finance.pdf

³ http://www.rcgp.org.uk/policy/rcgp-policy-areas/supporting-practices.aspx

 NHS England will work nationally to quality assure support through regular monitoring and by enabling learning and sharing of best practice, building on regional events that took place in summer 2017.

4 Funding

Funding available

NHS England will invest a minimum of £40m in the GPRP over four years (up to 2019/20).

Having funding guaranteed over 4 years means regional teams will be able to invest in support arrangements over the medium term, giving greater certainty and continuity in the support available to GP practices over the lifetime of the GPRP (notwithstanding local ambitions to ensure support continues to be responsive and evolving with local practice needs).

Funding breakdown

Financial Year	Funding allocated
2016/17	£16m
2017/18	£8m
2018/19	£8m
2019/20	£8m
Total	£40m

How funding is allocated

Funding is allocated on a registered population basis. <u>Annex A</u> provides details of remaining funding allocations for each regional team and DCO, updated for future years with latest registered patient population fair shares.

The funds will be transferred direct to DCOs at the start of each financial year. Funding is expected to reach DCOs in Month 2 (end May 2018). GP Forward View (GPFV) and NHSE regional finance colleagues processing transactions associated with these funds will need to refer to the GPFV coding guidance on Finance SharePoint - Section 15.10 of the GPFV reporting guidance. Please forward any queries to england.primarycarepmo@nhs.net

Nationally, the year to date spend, annual budget and forecast position will be reviewed monthly with the national Director of Primary Care delivery via the central Primary Care PMO function to ensure that funds are being utilised efficiently and appropriately, ultimately achieving value for money. The correct use of the codes provided in the coding guidance will ensure these reports are accurate.

Regional teams will work with key partners to ensure the funding is used to target support at areas of greatest need and will work in line with the processes set out in this guidance to deliver support to practices.

Funding considerations

While funding is available annually, delivering support through the GPRP is recognised as an ongoing process. This means following the first year of support regional teams will need to consider the ongoing requirements of those practices or groups of practices supported.

At the same time to ensure there is clarity on opportunities for new practices seeking support and to provide transparency on local decision making, regional teams should confirm indicative shares of the allocated funding against the following categories of intended spend:

- a) Continuing support for practices already in the GPRP
- b) Extending support to new practices
- c) Supporting practices to help each other building resilience at scale

These indicative shares should be developed and discussed with key partners and aim to reflect prioritised needs for support through the GPRP. It is recognised final expenditure may differ in view of changing local needs and delivery of support.

5 Menu of support

There are many definitions of struggling practices in need of support to become more sustainable and resilient. This means there is a wide range of support needed.

We have identified a menu of support for which the GPRP funding should be used to secure this at a local level. This will include the provision of immediate help to practices facing urgent operational pressures, to transformation support to move to more resilient care models. The menu of support comprises:

Rapid intervention and management support for practices at risk of closure

For example, the Central Midlands local team works with CCGs to offer assistance with practices that receive poor CQC ratings (this was in addition to the RCGP Special Measures peer support programme) to maximise prospects for turnaround.

This element of the menu of support is not just about working with practices with poor CQC ratings, although we recognise there are many definitions where practices may need rapid intervention support to prevent closure e.g. following sudden critical vacancies. One of the key concerns has been the ability to provide support quickly to practices to help coordinate key activities. This means the funding can be used to deliver rapid support including help to secure any immediate clinical capacity needs, assuring and supporting continuing operations and coordinating additional improvement needs to help with operational delivery and effectiveness.

Diagnostic services to quickly identify areas for improvement support

For example, seven practices in London were put forward for a diagnostic assessment from chosen suppliers (a local GP alliance and a non-local GP federation). This has helped identify some common themes to target support including lack of practice direction following significant personnel changes (a need to

develop practice vision) and scope to improve operational efficiency (leading to redesign of practice processes improving both practice responsiveness and efficiency).

Specialist advice and guidance – e.g. Operational HR, IT, Management, and Finance

For example, a small number of practices in Cumbria & North East local team wanted to take 'working together' to the next stage and agreed in principle on a merger. The limiting factor to making progress had been limited local practice capacity and expert advice to assist with proposals. These were addressed through programme funded support.

The programme funding can be used to secure expert advice and support on delivering any operational changes (e.g. help with demand and capacity planning, effective use of operational systems and processes including help to release capacity).

After consideration it has been decided that from 18/19 onwards, IT hardware and / or software will not be funded through the Programme. This is because both hardware and software require updating and GPRP funding is time-limited and there are other funding routes available for IT.

Coaching / Supervision / Mentorship as appropriate to identified needs

For example, South Central local team secured support from a multi-professional team helping a practice conduct a detailed review of safeguarding arrangements. The scheme supported training for all staff, as well as support and advice on developing an approach to clinical audit, and help and advice to individual GPs, through appraisal and access to occupational health support.

Practice management capacity support

For example, South Central local team has provided cover for practice manager sick leave, using an experienced business manager to help provide stability, support a practice diagnostic review and help to develop a practice action plan.

Coordinated support to help practices struggling with workforce issues

For example South Central local team helped a practice secure capacity for a practice nurse home visiting service for non-urgent chronic disease management for 3-months. This was to inform development of the practices skill mix and provide additional short-term capacity.

This element of the menu of support has been included as it is recognised that maintaining clinical sessions is a priority for practices struggling with workforce issues (e.g. sudden critical vacancies, sickness, and long term vacancies) and increasing competition for a diminishing workforce can escalate workforce challenges in local areas.

The funding can be used flexibly to secure practical workforce support. For example, regional teams can create a local pool of expert peer support by funding key elements of GP costs (e.g. General Medical Council, Medical Defence Organisation and appraisal toolkit fees) in return for securing a minimum clinical commitment (e.g.

2 sessions per week) to work to support practices. This would be a portfolio career choice, targeting experienced GPs who may have recently retired or who can offer additional clinical commitments, supporting GP retention/returners locally. Salary costs would remain practice responsibility. Alternatively, it can be used to establish post(s) in regional teams with responsibility for (and attached to) a locality, working with practices to help plan, coordinate and match their recruitment needs and opportunities. This could also include leading on developing pragmatic solutions for practices where short term barriers exist (e.g. help to support skill mix alternatives to GP recruitment during periods of maternity leave).

Change management and improvement support to individual practices or group of practices

For example, South West local team identified through local provider GPs and other local stakeholders a strong need for change management resource to support practices in thinking about and delivering future resilience. Support to practices was underpinned by a Project Management Office approach with project/change managers linking with practices to plan and deliver across 4 main work streams (new care models, infrastructure, working at scale and provider development).

The emphasis here is on providing dedicated project or change management support available to practice to help plan, develop proposals and implement changes. The GPRP funding can be used to target support at groups of practices including support for local strategic planning, future vision and review of practice business models, help to identify and realise opportunities to working at scale, succession planning, facilitating premises improvements or better use on IM&T etc.

Much of this initial menu of support should already be in place and being delivered as a consequence of the existing national programmes of turnaround support but we want to ensure the GPRP improves accessibility by developing local capacity and capability to deliver a wider range of practice support to practices and in a more agile and responsive way.

Greatest impact should be achieved under the GPRP by regional teams tailoring the menu of support to the assessed needs of practices in local areas. It is recognised there may be different views locally on the emphasis of practice needs, for example, whether investment should be used to prioritise help to practices with workforce issues or whether greater benefit would be achieved from targeting groups of practices at a scale to provide more upstream support.

Regional teams will continue to consult on their plans for delivering the menu of support with their key partners. For example GPRP funding can be used to fund:

- Additional local team capacity and capabilities to provide support directly for example 'local resilience teams', as established in some areas already, provide a resource with capacity to work with practices. Examples to date have included NHS England or CCG-employed staff
- Contracted third party Supplier(s) to work with practices including GP
 Federation or other at scale providers. Suppliers can provide specialist aspects of
 the menu and there is also potential to extend to delivery of local resilience teams

- Backfill (or other costs) for individual GPs and other practice team members –
 to work to provide peer support to practices locally, providing 'sender' practices have
 additional capacity to offer such support
- Section 96 Support and Financial Assistance where there are opportunities to support practices directly in delivering the menu of support with actions agreed under an MOU.

Where existing support teams or equivalent arrangements apply, the GPRP funds can be used to deliver support further and faster to practices. Regional teams are encouraged to consider how they can build on the foundations of the work they started with the Vulnerable Practices Programme and first and second years of the GPRP However, the emphasis on how this menu of support is delivered is on local flexibility.

6 Building Personal Resilience

There is also the human dimension to supporting practice sustainability and resilience. Personal resilience is widely recognised and evidenced as an important factor in organisational resilience which is recognised in the GPRP.

In parallel to the GPRP, NHS England launched in January 2017 the NHS GP Health service⁴, a free and confidential treatment service providing support for GPs and trainee GPs who may be suffering from mental ill-health and addiction.

Regional teams will recognise the upstream benefits of supporting GPs, practice nurses and wider practice team members to develop personal resilience skills and will consider with their key partners whether access to personal resilience training would be a helpful facet of the local GPRP support offer.

7 Other support available

There are other sources of targeted funding available from NHS England that may contribute to the resilience of a practice or practices (e.g. other GP Forward View programmes). Regional teams should be aware that these can be pursued in addition to funding from the GPRP.

In 2018/19, following feedback from colleagues and GPs, we will be collating a list of all the support offered through the GPFV so that it is easy to see the breadth of funding and support available.

8 Identifying practices to support

The national criteria as applied in previous years will continue and shall be applied by regional teams to identify practices to receive support under the GPRP. Resources under the GPRP allow support to be made available to a wide spectrum of practices, including

_

⁴ www.gphealth.nhs.uk

providing 'upstream' support i.e. practices at the tipping point who may be struggling with workload but who are otherwise operationally stable.

Local teams have the flexibility to quickly identify practices for support under the GPRP by selecting:

- Practices previously prioritised and offered support but who did not take this up
- Groups of practices where practice based assessments identify a need in a
 particular locality or place (e.g. s there is a risk of domino effect unless support is
 targeted at scale).

Regional teams will also need to identify which practices previously supported through the GPRP will require continuing support, but this should not prevent 'new' applicants accessing support.

The following key lines of enquiry should be applied to the assessment of continuing support needs, ensuring a systematic approach to decisions on identifying which practices to continue to support:

- Has the earlier support now been delivered?
- Did this earlier support achieve what it set out to achieve?
- Has a longer term commitment been made to the practice / group to continuing support (e.g. as part of an agreed MOU)?
- If further support is not provided would this mean earlier support delivered is less impactful and represents poor value for money?
- Is there continuing support from CCG and / or LMC for this practice / group to remain part of the GPRP?

Decisions and thresholds set locally should be made on the basis of local intelligence and decisions as to where the greatest impact can be achieved using the available resources. Regional teams will again need to work in conjunction with key partners here.

Regional teams will need to work with all their constituent CCGs to ensure that support is targeted more effectively to practices or areas in greatest need, meaning prioritisation at a regional team footprint and across and between CCG areas to ensure greatest impact. This means that funding should not simply be divided equally among the number of CCGs or practices. This is not the most effective way of supporting practices and is not how the Resilience funds are intended to be distributed.

Both regional and DCO teams will need to ensure that practices are kept informed of progress and that communication is timely. It is recommended that decision-making processes are shared with CCGs and practices so parties know what to expect.

Regional teams will need to keep assessments under regular review, in line with existing local arrangements, and should ensure there are clear opportunities for practices to self-refer for assessment for improvement support under the GPRP (template at Annex B. Please note, self-referral forms should be sent to the relevant regional contacts listed on the NHS England website). This will include making available a named local team contact for practice enquiries that can be included in local and national communications. Regional teams will need to ensure they have necessary processes in place to embed the national self-referral enquiry template into local processes on selecting practices for support. This

must include ensuring any practice self-referring for support using this template receives a response acknowledging their application within 10 working days of receipt. Regional teams will need to ensure that practices who self-refer are informed of timescales for decision-making and that communication is timely.

Annex C sets out the national criteria to support ongoing assessment and prioritisation of support.

Regional teams will need to be able to confirm details of those GP practices they have agreed to support. The data return template will capture this and will be circulated separately. Reporting arrangements and timescales have been reviewed to make incremental improvements to the process, following feedback. Further details on reporting return requirements can be found in the Key Milestones section.

9 Case studies

From 2018/19 case studies will be a formal part of the assurance process for this programme which will add to the quantitative data already being gathered. This will enable NHS England to understand the outputs and evaluation of support delivered to date in order to capture the effectiveness of the GPRP.

To improve the qualitative data for the programme each region will be required to submit 10 case studies in 2018/19. Further details on reporting deadlines can be found in the Key Milestones section.

DCOs are asked to submit a variety of case studies, ideally covering each of the support categories. It is recommended that practices are identified to submit case studies as part of the planning process. Although practice data is required as part of the case study submissions, practices can opt-out of their name being included when case studies are published. The most useful case studies shared during the learning events in summer 2017 were those that included reflections on what didn't work well as well as what did go well.

10 Practice commitment

Support to GP practices (whether supported individually or through a primary care network, Hub, STP, or ICS) will be conditional on *matched commitment* from practices, evidenced through an agreed action plan which will need to include clear milestones and clear indication of when the financial support ends (i.e. an 'exit strategy'). Practices will not be required to match-fund the support.

GPRP funding should not be used where there is no identifiable exit strategy for support and where there is no engagement with the local primary care strategy.

GP practices selected to receive support under the GPRP will be expected to enter into a non-legally binding Memorandum of Understanding (MoU) with NHS England. The MoUs will be signed and held locally (MoU data reporting deadlines are listed in the Key Milestones section).

The template MoU (Annex D), should be used by regional teams and practices to record local arrangements, including objectives and responsibilities in respect of any support or funding provided. MoUs form a vital part of the Finance assurance process and therefore must be in place to provide a clear audit trail.

11 National support and focus

Regional teams are reminded of the materials produced in 2016/17 to help with future procurements for GPRP support. This comprised help to navigate procurement channels and support for the business case approval process (nine sample business cases covering the menu of support).

In 2018/19, central support will continue to focus on understanding the outputs and evaluation of support delivered to date so that the effectiveness of the GPRP so far can be captured.

12 Key milestones

NHS England is committed to ensuring this programme delivers support where needed and ensure decision making is not protracted.

Regional teams are required to implement and assure local implementation progresses in line with the following milestones.

Regional teams are reminded that deadlines are absolute. To reduce the reporting burden, reporting requirements are no longer monthly (following a successful trial in 2017/18) and there is not a separate reporting date for the status of MoU returns. However, regional teams are reminded that MoU signatures are an important part of the assurance process for this programme and must be in place.

Actions required prior to first data submission deadline

By early July 2018:

- Regional teams to have refreshed delivery plans with CCGs and LMCs, including decision on indicative share of resilience funds to be used for continuing support and/or for extending support to new practices or groups.
- Regional teams to have communicated any critical local processes/ timescales/deadlines to practices engaged in or seeking support and for these to be underway.

By the end of July 2018

- Regional teams to have prioritised continuing practices that will be supported and any new practices for support (supported offered and confirmed).
- By the beginning of September 2018 (for all practices confirmed taking up support at the end of July):

- All business cases for securing third party support to have been submitted for approval.
- All MOUs agreed with GP practices (if funding is being allocated to a CCG where support is being delivered to a number of practices, then an MoU must be in place to provide an adequate audit trail of funding streams and delivery commitments)
- By end September 2018 (for all practices confirmed taking up support at the end of July):
 - Deadline for any direct funding to be made to GP practices (where this is the agreed delivery route linked to actions in the MOU)
 - Assure 100% of allocated funds have been committed i.e. evidence planned commitments.

Data reporting deadlines (for data returns to national team)

- Friday 5 October 2018 (by 5pm)
 - First data report submission deadline to include:
 - 100% of funding committed
 - All MoUs agreed
- Tuesday 8 January 2019 (by 5pm)
 - Second data report submission deadline to include:
 - 75% of allocated funding to be spent
 - First case study submission deadline to include:
 - 4 case studies per region
- Tuesday 5 April 2019 (by 5pm)
 - Third data report submission deadline to include:
 - o 100% of allocated funding to be spent (i.e. not on NHSE ledgers)
 - Second case study submission deadline to include:
 - Remaining 6 case studies per region (to take total per region for the year up to 10)

Compliance with these milestones will be actively monitored through established reporting arrangements and performance will be escalated where necessary to Regional Directors and Regional Directors of Commissioning Operations.

Queries

Following feedback from operational resilience leads in 17/18, we are encouraging greater information-sharing between resilience leads in 2018/19, to share best practice and provide peer support. A distribution list has been circulated and will be updated and circulated from the central team as required.

If you have any questions about the programme which are not covered by the information in this guidance please email england.primarycareops@nhs.net using the subject heading "GPRP Question".

13 Data Sharing / Demonstrating Progress

External data sharing

Both qualitative and quantitative data is used to report on progress of the GPRP through existing NHS England reporting arrangements. Quantitative data (numbers of practices supported and funding allocated / spent) forms part of the reporting requirements for the GP Forward View.

Internal (NHSE) data sharing

Quantitative data returns

As in 2017/18, data returns submitted in 2018/19 will be collated and cleansed by the central Primary Care Commissioning Team and NHSE analysts. Queries will be resolved with local resilience leads and a final data return including all regional returns will be collated. This will then be sent back to Heads of Primary Care and Resilience Leads for completeness.

Qualitative data returns (case studies)

Case studies will be collated by the Primary Care Commissioning Team. Practice data is required as part of the case study submissions but practices can opt-out of their name being included when case studies are published.

14 Annex A – Remaining Funding allocations

This page is intentionally blank. This guidance will be re-issued in summer 2018 when the annual financial audit has been completed. DCOs are aware what their annual allocations will be for 18/19.

15 Annex B – Self-referral / inquiry template

General Practice Resilience Programme Self-referral / inquiry for support – Page 1

Please complete all fields where applicable.

Completed forms should be sent to your local NHS England resilience programme lead - contact details are available here:

16 Annex C - National Criteria

Identifying General Practice sustainability and resilience needs is challenging. There are elements of any assessment which are subjective and deciding on the nature, severity or weight of issues facing individual practices are even more problematic to measure. These criteria (as previous) seek to chart a middle route between those aspects that are measurable and those less tangible issues which can help identify and prioritise practices sustainability and resilience needs. The nature of the issues facing a practice can be grouped generally as follows; demand, capacity and internal issues.

The range of criteria identified below can be used as a screening tool by local commissioners to guide their assessment with local stakeholders on offers of support to improve sustainability and resilience. Based on this assessment regional teams should use the support matrix (effectively rating the need and impact of support). This can be used to prioritise practices for support within a given organisational or geographical area as well as to target support between areas where there is likely to be greatest benefit.

It is suggested that regional teams will utilise their judgement when completing the assessment working with their key partners. It should be noted that the criteria overlap in some cases, for example a practice with a high vacancy level may also seek to close their list to new registrations.

Considerations

Patient safety is paramount - when undertaking the assessment if it becomes evident that safety could be compromised, commissioners should be alert to the need for escalation through the appropriate channels, whilst recognising the need for continuing support.

Domain	Criteria	Description and rationale for inclusion
Safety		
1.	CQC rating – inadequate	Practices rated as inadequate by the CQC are already directed to the RCGP Peer Support Scheme. It is not proposed that this is changed but is included within the criteria for the sake of completeness and recognising practices moving out of special measures may still need additional 'upstream' support.
		Update 2017/18: The RCGP Peer Support Scheme continues to offer up to six months turnaround support, up to the value of £10,000 for GP practices entering into special measures following a first CQC inspection rating. Over

Domain	Criteria	Description and rationale for inclusion
		115 practices have taken up this support so far.
2.	CQC rating - requires improvement	Practice rated as requiring improvement where there is greatest need for support are already directed to the vulnerable practice programme. It is not proposed that this is changed but is included within the criteria for the sake of completeness and recognising additional 'upstream' support may still be needed. FAQs provide further guidance. Update 2017/18: The Vulnerable Practice Programme came to completion in March 2017 with over £10m invested in diagnostic and improvement support to 714 practices.
3.	Individual professional performance issues	This reflects that sometimes the overall operations of the practice can impact on or be impacted by professional performance issues.
Workforce		
4.	Number of patients per WTE GP and/or WTE Practice Nurse	These criteria help detect significant workload facing a practice in comparison to other practices. Neither criteria are an indicator of the need for support in themselves but they may indicate opportunities for improvement support, including skill mix.
5.	Vacancies (including long-term illness)	This is a key local indicator of a practices sustainability and resilience. It is a crude 'measure' however in that long term or sudden critical vacancies may impact on operations of the practice in different ways. It will be important to consider the nature of the vacancies. The proportion of staff in the practice aged 55 and over may also be an important consideration given potential for early retirements.
External Perspe	ctive	
6.	Other external perspectives not covered in the above criteria, for example significant support from LMC, CCG or NHS England local team	This is a key criteria. The level of support increases dependent upon how many local external bodies have significant concerns. Practices self-referring for support may also be considered here.
7.	Primary Care Web Tool	Using this tool and in particular those practices that trigger 5/6 or more outlier indicators provides an indication of some issues in a practice that may require support.
Organisational I	ssues	
8.	Practice leadership issues (partner relationships)	This is a key area where practices may need support but it is difficult to define so will be for local commissioners to reflect and justify.

Domain	Criteria	Description and rationale for inclusion
9.	Significant practice changes	It is self-evident that this increases the need for support for individual or groups of practices. Practice mergers may make local practices stronger and more resilient, practice splits less so but still requiring support to ensure sustainable operations.
10.	Professional isolation	This is a self-evident criterion, but there are many resilient single handed practices that continue to operate successfully. However by definition a single handed practice has less resilience than a larger practice. Again it would be for local commissioners to reflect a risk rating against this.
Efficiency	1	•
11.	QOF % achievement	This is often used as a shorthand measure of how well a practice is operating. The vast majority of practices score well above 90% with average 94% achievement. Just 500 practices score under 80% achievement, 100 practices score under 65% achievement. 21 practices achieve a score which is half of England average achievement (47%). Significant changes in achievement could also evidence changes in operations in need of support.
12.	Referral or prescribing performance compared to CCG average	It is proposed that this is flagged where a practice is a clear outlier (e.g. top / bottom 5%) for aggregate prescribing or referral rates compared to the CCG average.
Patient Experien	ice/ access	
13.	List closure (including application to close list)	This is a key indicator and is akin to the practice self-declaring that they need support. It is a crude 'measure' in that the practice may need support to meet an increase in demand or it may need support to better manage its current demand. It will be important to consider the reasons for list closure. It will be important for local commissioners to also reflect here on practices with refused applications or practices bordering onto a closed list practice.
14.	GP Patient Survey - Would you recommend your GP surgery to someone who has just moved to your local area? (% no).	This is one of a set of patient experience criteria that could be usefully included. Patient advocacy is known to correlate with good quality care.
15.	GP Patient Survey – ease of getting through by phone (% not at all easy).	Could be usefully included in that it provides an early indication where practices may be supported to better match or manage capacity and demand issues.
16.	GP Patient Survey - ability to get an appointment to see or speak to	Could also be usefully included in that it provides an early indication where practices may be supported to better match or manage capacity and demand issues.

Domain	Criteria	Description and rationale for inclusion
	someone (% no)	

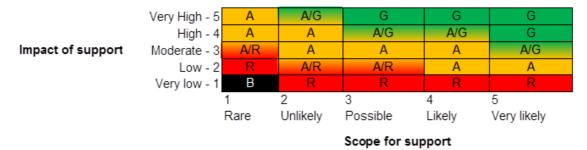

Sustainability and Resilience Support Matrix

Following an assessment of the criteria above local NHS England teams should decide where individual practices should be placed on the support matrix below.

Placement should be scored between 1-5 for both scope for support and impact of support. Descriptions for scoring are also provided.

Local NHS England teams will need to ensure there is a record justifying placement based on their assessment of the criteria and demonstrating a consistent approach to the assessment of practices.

Support Matrix

Description: Scope for support

	Likelihood Scoring				
	1		2 3		5
Descriptor	Rare	Unlikely	Possible	Likely	Very Likely
Frequency / What is the scope for support the practice?	There is no evidence that support is needed	Do not expect it to need support, but it is possible it may do so in the future	Might need support on basis of evidence presented	Likely need support because of specific issues/circumstances but not expected to persist.	Very likely to need support because of persisting local issues or circumstances.
					Very likely to need support because of

		specific urgent issue of circumstance.

Description: impact scoring

	Likelihood Scoring				
	1 2 3			4	5
Descriptor	Rare	Unlikely	Possible	Likely	Very Likely
Frequency / What is the scope for support the practice?	Very minor support needs Minimal impact for practice, staff, patients	Single support issue Low impact on practice and staff, and negligible impact for patients	Moderate impact of support for practice, staff and for multiple patients	Significant effect for practice and staff if support provided, and moderate impact for patients.	Very significant impact for practice, staff and patients if support provided

1. PARTIES

- 1) **NATIONAL HEALTH SERVICE COMMISSIONING BOARD** of Quarry House, Quarry Hill, Leeds, LS4 7UE (**NHS England**).
- 2) INSERT GP PRACTICE NAME of Insert GP Practice address / Registered office of Practice (the Practice).

2. BACKGROUND & PURPOSE

- 2.1 This MoU forms part of the General Practice Resilience Programme (GPRP) guidance which describes how NHS England sets out how to provide 'upstream' support to practices experiencing difficulty by investing £40m over the next four years to support primary care general practice. The guidance can be found here: https://www.england.nhs.uk/ourwork/gpfv/resilience/
- 2.2 This MoU is to be used to provide clarity and understanding of the support services being provided to the Practice by NHS England and/or a third party supplier (Supplier) as set out in Appendix 1 of this MoU (Improvement Plan) and provide assurance on what can be expected as part of the GPRP.

3. PRACTICE ROLES AND RESPONSIBILITIES

- 3.1 The Practice will be expected to fully engage in the GPRP working with NHS England and any Supplier to ensure effective use of resources in a timely and effective manner.
- 3.2 The Practice acknowledges that a high level of commitment is essential for optimal impact and the Practice will make available such staff as are required to develop and implement the Improvement Plan at the request of NHS England/the Supplier.
- 3.3 The Practice will adopt an open approach and engage effectively with other stakeholders including other practices, the local medical committee and patients (including the patient participation group) where appropriate to enable an inclusive approach to the Improvement Plan set out in this MOU.
- 3.4 The Practice will share all information with NHS England and/or the Supplier that is relevant to the delivery of the Improvement Plan of this MOU.
- 3.5 The Practice retains full responsibility for all aspects of their contractual and professional obligations regarding the provision of primary medical care services to their patients.
- 3.6 The Parties have entered into this MoU in good faith to improve the Practice as set out in this MoU.

4. NHS ENGLAND ROLES AND RESPONSIBILITIES

4.1 NHS England will secure the provision of the Support Services as set out in Appendix 1 (Improvement Plan) paragraph 2 (Support Services) of this MoU. The Support Services may be provided by NHS England or by a third party supplier (the Supplier)

- at the discretion of NHS England and may be withdrawn with a given notice period, in accordance with <u>Clause 12</u> (Termination) of this MoU.
- 4.2 NHS England may share any relevant information with the Supplier and Practice that may help inform the delivery of the Improvement Plan subject to Clause 9 (Confidentiality) of this MoU.
- 4.3 NHS England will be responsible for holding the Supplier to account where agreed actions have not been completed or delivered in accordance with this MoU.

5. KEY OBJECTIVES FOR THE MoU

5.1 The parties shall sign up to the Improvement Plan to achieve the key objectives set out in Appendix 1 (Improvement Plan) Paragraph 1 (Key Objectives) of this MoU.

6. PRINCIPLES OF COLLABORATION

- 6.1 All parties to this MoU will use their reasonable endeavours to co-operate in the implementation of the Improvement Plan in order to effectively address the resilience and sustainability of the Practice, in the overall interests of patients.
- 6.2 All parties will adhere to the terms set out in this MoU and supporting appendices.

7. GOVERNANCE

- 7.1 NHS England retains the overall responsibility for the GPRP and has nominated strategic and operational leads who will act as key points of contact for the Practice and NHS England. For the purposes of the Improvement Plan:
 - a) The Strategic Lead shall be Insert name and contact details of strategic lead
 - b) The Operational Lead shall be: Insert name and contact details of operational lead
- 7.2 The Strategic Lead will act for NHS England in providing strategic oversight and direction of the Improvement Plan as part of the wider oversight and governance of the GPRP in relation to the Practice. The Strategic Lead must be a member of NHS England.
- 7.3 The Operational Lead will liaise on all operational matters relating to the agreed contributions to support delivery of the Improvement Plan and advise the Strategic Lead, providing assurance that the Key Objectives are being met and that the Improvement Plan is performing within the boundaries agreed with the Practice. The Operational Lead may be a member of NHS England or a representative nominated by NHS England.
- 7.4 The Practice shall nominate a Practice Lead and notify NHS England of the name and contact details of the Practice Lead. For the purpose of the Improvement Plan:
 - a) The Practice Lead shall be: Insert name and contact details of practice lead

7.5 The Operational Lead and the Practice Lead shall agree the Improvement Plan and Key Objectives, and will identify the commitments to support its delivery. The Strategic Lead will then approve the Improvement Plan for implementation.

8. REPORTING

- 8.1 The PRP will be continually evaluated. Practices will be required to report on progress of the Improvement Plan as well as support any other reporting requirements agreed between the parties.
- 8.2 Reports should wherever possible utilise existing systems of communication between the parties, and be reasonable in accordance with the capacity of the Parties and/or reflective of the requirements of the Improvement Plan. Reporting will not be onerous, and will not be the basis of any performance management of the contract. Frequency and content of reporting will be as follows:

DRAFTING NOTES: Insert details of agreed reporting here e.g. delivery of progress against any key milestones agreed, assessment of support and its effectiveness when key objectives delivered.

Each paragraph inserted here must be formatted as followed:

- a)
- b)
- c) DRAFTING NOTES: delete this paragraph if not necessary for this practice / group of practices. [insert name of practice / practices if part of Hub] will be required to submit a case study detailing their experience of the GPRP intervention. The details of the case study and the submission deadlines are to be agreed locally.

9. ESCALATION

- 9.1 If either party has any issues, concerns or complaints about the Improvement Plan, or any matter in this MoU, that party shall notify the other party and the parties shall then seek to resolve the issue by a process of negotiation to decide on the appropriate course of action to take.
- 9.2 If the issue cannot be resolved within a reasonable time the matter shall be escalated by the Practice Lead and/or the Operational Lead to the Strategic Lead for resolution who may seek advice of the local medical committee in reaching their decision.

10. CONFIDENTIALITY

10.1 NHS England recognises that the success of the GPRP relies on the Practice being open with the Supplier and that the Support Services may raise the need to address sensitive issues for the Practice. Where this applies, NHS England may accept that the Practice and the Supplier may enter into a confidentiality agreement to protect certain aspects of data collected by the Supplier in their role of providing the Support Services.

11. DURATION

- 11.1 It is important that the GPRP supports as many practices as possible; therefore the Improvement Plan will need to be time-limited to meet the strategic objectives of the wider GPRP. The Improvement Plan should describe an agreed exit strategy. Where there is an identified ongoing need, this MoU may be extended at the sole discretion of NHS England to offer an additional period of support to the Practice subject to availability of resources.
- 11.2 This MoU shall become effective upon signature by both parties, and will remain in effect until Click here to enter a date or the date the Improvement Plan is delivered, whichever is the sooner, unless otherwise varied or terminated by the parties.

12. VARIATION

12.1 Save for the circumstances described in Clause 10.1 this MoU, including the corresponding appendices, may only be varied by written agreement of both parties.

13. TERMINATION

- 13.1 Either party may terminate this MoU by giving at least three months' notice in writing to the other party without reason.
- 13.2 In addition, NHS England may terminate this MoU by giving at least one months' notice in writing to the Practice where, acting reasonably, and in discussion with the local medical committee as the representative body, it considers that the Practice has failed to cooperate or to fulfil its roles and responsibilities under this MoU.
- 13.3 Where the termination is not a mutual agreement, Parties should refer to Clause 8 (Escalation) of this MoU.

14. CHARGES AND LIABILITIES

- 14.1 Except as otherwise stated in this MoU, the parties shall each bear their own costs and expenses incurred in complying with their obligations under this MoU.
- 14.2 The parties agree to make the contributions set out in Appendix 2 (Contributions) to this MoU. The Support Services provided by NHS England (or by a Supplier on its behalf) are made at NHS England's absolute discretion and may be changed or withdrawn, providing reasonable notice is given to the Practice where such notice is practicable.
- 14.3 Except as otherwise stated in this MoU, both parties shall remain liable for any losses or liabilities incurred due to their own or their employee's actions. Neither party intends that the other party shall be liable for any loss it suffers as a result of this MoU.

15. STATUS

15.1 This MoU is not intended to be legally binding, and no legal obligations or legal rights shall arise between the parties from this MoU. The parties enter into the MoU intending to honour all their obligations.

15.2 Nothing in this MoU is intended to, or shall be deemed to, establish any partnership or joint venture between the parties, constitute either party as the agent of the other party, nor authorise either of the parties to make or enter into any commitments for or on behalf of the other party.

Appendix 1 - Improvement Plan

1. KEY OJECTIVES

- 1.1 The key objectives for developing greater sustainability and resilience are set out below.
- 1.2 These key objectives form the basis of the operational delivery of the Improvement Plan to secure greater sustainability and resilience and present achievable aims for the agreed period of support.
- 1.3 The objectives should be grouped into three main categories which centre around:
 - a) securing operational stability;
 - b) developing more effective ways of working; and
 - c) working towards future sustainability, including if appropriate helping practices to explore new care models
- 1.4 The key 'SMART' objectives of this Improvement Plan are:

DRAFTING NOTES: Insert key 'SMART' objectives here. Each paragraph inserted here must be formatted as followed:

d)

e)

f)

2. THE SUPPORT SERVICES

2.1 The Support Services to deliver this Improvement Plan are:

DRAFTING NOTES: Insert details of the support services as agreed to be provided by NHS England and/or commissioned to a Supplier to deliver the objectives of this improvement plan.

You may insert text from or imbed the documentation as part of any procurement activities in commissioning a Supplier, then providing a summary of the Support Services here and within the table in Appendix 2 (Contributions).

Each paragraph inserted here should be formatted as followed:

a)

Appendix 2 – Contributions

1. DESCRIPTION OF CONTRIBUTIONS

- 1.1 This MoU does not act to pass financial or resource contributions between the parties, but the details of any contributions that will be made by either party shall be set out here. The terms of any financial assistance (if included) will be set out in a separate agreement.
- 1.2 The Operational Lead should for example confirm and describe which of the menu of services will be commissioned on behalf of the Practice and agree with the Practice Lead what commitments will be required from the Practice in order for the Improvement Plan to be delivered. Note this list is not intended to be exhaustive and may be modified as required.
- 1.3 NHS England has stated it may on occasion use its powers under Section 96 of the 2006 NHS Act to achieve the aims of GPRP by providing financial assistance to a practice for the purposes of securing the provision of Support Services. Any such financial assistance is at the discretion of NHS England and may be withdrawn at any time, in accordance with Clause 12 (Termination) of this MoU.
