Useful links and resources

NHS England

The Test Beds programme is a pioneering project which combines digital technologies and new models of care and tests them in the real world. The programme generates evidence that can drive the uptake of digital innovations at scale and pace across the health and care system and share learning around what works. Learning generated from Wave 1 of the Test Beds programme demonstrated the critical importance of a structured approach to tackling information governance challenges throughout the life of a project. This compendium of useful links and resources accompanies the detailed learning captured in NHS England Test Beds Programme: Information Governance learning from Wave 1. It should be used as a directory for further reading around specific topic areas.
