

SPECIALISED COMMISSIONING – RESPONSE TO AMENDMENTS REQUESTED TO EVIDENCE REVIEW DURING ENGAGEMENT

URN	170105P
POLICY TITLE	Human coagulation factor X for hereditary factor X deficiency
CRG:	Specialised blood disorders - F02
NPOC:	Bleeding disorders
PUBLIC HEALTH LEAD:	[REDACTED]

Description of comments during consultation	A statement and slide set were submitted to Specialised Commissioning by The Haemophilia Society (1 Oct 18) following a stakeholder surgery where stakeholders were invited to provide comments on the CPAG cover sheet.
Action taken by Public Health lead	<p>References provided in the statement and slide set were assessed for relevance to the evidence review against search strategy terms and PICO framework.</p> <p>References from the statement prepared by Prof Makris:</p> <p><i>The following 6 references are more than 10 years old and would not be included according to standard methodology:</i></p> <ul style="list-style-type: none"> • Makris et al., Thrombosis and Haemostasis 1997;78:1426-1429 • Wolberg et al., Blood 2003;101:3008-3013 • Dusel et al., Blood Coagulation and Fibrinolysis 2004;15:405-411 • Cushman M., Seminars in Haematology 2007;44:62-69 • Girolami et al., Journal of Thrombosis and Thrombolysis 2006;21:279-284 • Lusher JM., Seminars in Hematology 1991;28:3-5 <p><i>The following 2 references include populations of people with factor VII deficiency and are therefore not relevant to the population described in the PICO framework (people with factor X deficiency):</i></p> <ul style="list-style-type: none"> • Wiszniewski et al., Blood Coagulation Fibrinolysis

	<p>2015;26:324-330.</p> <ul style="list-style-type: none"> • Mariani et al., Thrombosis and Haemostasis 2013;109:238-247 <p><i>The following reference is a narrative review of prothrombin complex concentrates and does not present results of studies of the population described in the PICO framework (people with factor X deficiency)</i></p> <ul style="list-style-type: none"> • Sørensen et al., Critical Care 2011;15:201-209 <p>References from the slideset prepared by Dr Liesner:</p> <p><i>The following 3 references are more than 10 years old and would not be included according to standard methodology:</i></p> <ul style="list-style-type: none"> • Peyvandi et al., British Journal of Haematology 1998;102(2):626-8. • Herrmann et al., Haemophilia 2006;12(5):479-89. • Monagle et al. Thrombosis and Haemostasis 2006;95(2):362-72 <p><i>The following reference is a narrative review of prothrombin complex concentrates and does not present results of studies of the population described in the PICO framework (people with factor X deficiency)</i></p> <ul style="list-style-type: none"> • Sørensen et al., Critical Care 2011;15:201-209
Outcome	<p>Low grade evidence identified by stakeholders that does not materially affect the conclusions of the existing evidence review.</p>
