Dear Colleagues

COMMUNITY PHARMACY CONTRACTUAL FRAMEWORK

This agreement translates associated commitments in the NHS Long Term Plan into a five-year contractual framework, setting out an ambitious programme of work to help more people stay well within the community. The framework sets out the introduction of new clinical services to develop and expand the role of community pharmacy across three key areas: prevention, urgent care and medicines safety, with community pharmacies further integrated as part of local Primary Care Networks in the way they deliver services.

In summary, the deal:

• Commits almost £13 billion to community pharmacy through its contractual framework, with a commitment to spend £2.592 billion in each of the next five financial years. This significant investment, compared to original government plans, recognises the contribution that community pharmacy has committed to make towards delivery of the NHS Long Term Plan;

• Provides 5-year stability allowing businesses to make long term decisions and to discuss investment with banks and suppliers;

• Signals a move towards a much more clinically focused service;

NHS England and NHS Improvement
• Confirms community pharmacy’s future as an integral part of the NHS, delivering clinical services as a full partner in local Primary Care Networks;

• Describes new services which will immediately be offered through community pharmacy as well as a programme to develop evidence-based additions to those services. Foremost amongst the new services is the new national NHS Community Pharmacist Consultation Service, connecting patients who have a minor illness with a community pharmacy which should rightly be their first port of call. This begins with referrals from NHS 111 with piloting of expansion to referrals from GP practices, 111 online, UTCs and A+E, and appropriately relieving pressure elsewhere in the urgent care system;

• Underlines the critical role of community pharmacy as an agent of improved public health and prevention, embedded in the local community. To underpin this, terms of service will be updated so that by April 2020 being a Level 1 HLP will become an essential requirement for community pharmacy contractors.;

• Recognises that an expanded service role is dependent on action to release pharmacist capacity from existing work. The deal rationalises existing services and commits all parties to action which will maximise the opportunities of automation and developments in information technology and skill mix, to deliver efficiencies in dispensing and services that release pharmacist time;

• Continues to prioritise quality in community pharmacy and to promote medicines safety and optimisation. The current programme of Medicines Use Reviews in community pharmacy will be phased out by the end of 2020/21 as the new programme of structured medication reviews is delivered via PCNs;

• Underlines the necessity of protecting access to local community pharmacies through a Pharmacy Access Scheme; and

• Commits to working on a range of reforms to reimbursement arrangements to deliver smoother cash flow, and fairer distribution of medicines margin and better value for money for the NHS.

This agreement will come into effect from October 2019 and run through to March 2024.

For further details please read our Community Pharmacy Contractual Framework Briefing. We are also planning a series of opportunities to help colleagues understand the changes in full; further communications will follow. In the meantime, if you have any queries they can be submitted to ENGLAND.CommunityPharmacy@nhs.net.
Yours faithfully

Ed Waller
