University Hospitals of Morecambe Bay NHS Trust	Aug-21	NW		
Barking Havering and Redbridge University NHS Trust	Oct-21	London		x
Oxford University Hospitals NHS Trust	Oct-21	EoE		x

Annex A: Current Entry and Exit Criteria for the Maternity Safety and Support Programme (MSSP)

Inclusion criteria	Exit criteria
<p>Maternity services which have:</p> <ul style="list-style-type: none">• an overall rating of Inadequate• an overall rating of Requires Improvement with an Inadequate rating for either Safe and Well-Led, or a third domain.• been issued with a CQC warning notice.• dropped their rating from a previously Outstanding or Good rating to Requires Improvement in the Safety or Well Led domains.• DHSC or NHS England/Improvement request for a Review of Services or Inquiry• been identified to the CQC with concerns by HSIB	<p>CQC improves the rating by at least one in the safe & well led domains</p>

To Note:

The entry and exit criteria are currently under review as the CQC have updated the inspection protocols and no longer routinely give a rating on reinspection. Therefore, the CQC inspection will be one data point in the decision to enter or exit the programme.

The exit criteria from the MSSP will be defined and agreed with the regional team and Trust following completion of the diagnostic phase of the programme.

We are working with the CQC and organisations on the MSSP where sustained improvement would have resulted in an improved CQC rating, to manage their exit from the programme.

Statements in Bold - expansion of the criteria from May 2020, agreed at Provider Oversight Committee, to take a more proactive approach of support.
