MHG16-PR	Proportion of admissions where patient is suffering from a relapse episode	Of those in the denominator, the number who were admitted due to suffering from a relapse in their illness	The total number of patients admitted in the reporting period	Quarterly	Quarterly	Provider	Provider		The purpose of this metric is to ensure that services are aware of patients' history of mental illness such that appropriate plans are in place to mitigate against the increased risk of admission. The previous episode(s) of mental illness need not have resulted in an MBU admission for patients to be counted here. A patient should be considered as experiencing a relapse episode if the individual has had a previously recorded diagnosis of the same type of mental illness (if not the same diagnosis code), at any prior point in time. Admissions in a relapse period are not the same as readmissions, as the relapse admission refers to an episode of mental illness which occurs after an initial episode taking place a previous point.
