# Healthcare associated infection (HCAI) compendium of guidance and resources

Version 12, 3 April 2024

Updates to the previous version are highlighted in yellow

This compendium collates current guidance, guidelines, policy and legislation, and other resources related to infection prevention and control (IPC) into a single source. This compendium will be routinely updated (at least quarterly) to incorporate new or updated resources and remove resources that have been withdrawn.

Disclaimer: No responsibility will be taken for any omissions to or the content of the compendium. Any questions regarding any of the guidance documents should be directed to the appropriate organisation.

Note: NHSE are developing an alternative format for this compendium which will improve usability and accessibility.

## Contents

1. Antimicrobial resistance and prescribing.....	3
2. General IPC .....	5
3. Aseptic technique.....	7
4. Preventing infections associated with vascular access devices.....	8
5. Preventing urinary tract infections.....	8
6. Surgical site infection .....	10
7. Respiratory infections (including pneumonia) .....	11
8. Health technical memoranda/Health building notes .....	12
9. Hand hygiene.....	15
10. Personal protective equipment .....	17
11. Safe management of patient care equipment and the care environment.....	18
12. IPC during care of the deceased .....	22
13. Safe management of linen.....	22
14. Occupational safety including the prevention of sharps injuries .....	22
15. High consequence infectious diseases.....	23
16. Management of outbreaks .....	24
17. Healthcare associated infection surveillance and reporting.....	25
18. Risk assessment and the hierarchy of controls .....	26
19. IPC in the ambulance service .....	27
20. IPC in prisons, education, childcare and social care settings .....	28

# 1. Antimicrobial resistance and prescribing

Date	Title	Summary description	Author/owner
24.01.2019	<a href="http://www.gov.uk">UK 20-year vision for antimicrobial resistance - GOV.UK (www.gov.uk)</a>  <a href="http://www.gov.uk">UK 5-year action plan for antimicrobial resistance 2019 to 2024 - GOV.UK (www.gov.uk)</a>	The vision and plan were developed across the government, its agencies and administrations in Scotland, Wales and Northern Ireland, with support from a range of stakeholders. It is supported by the UK 5-year action plan for antimicrobial resistance 2019 to 2024.	UK Government, Department for Health and Social Care, Department for Environmental, Food & Rural Affairs
16.05.2022	<a href="http://www.gov.uk">Addendum to the UK 5-year action plan for antimicrobial resistance 2019 to 2024 - GOV.UK (www.gov.uk)</a>	Sets out changes to the commitments in 'Tackling antimicrobial resistance 2019 to 2024: the UK's 5-year national action plan'.	Department for Health and Social Care, Department for Environmental, Food & Rural Affairs
03.04.2017	<a href="http://www.gov.uk">Antimicrobial Resistance: resource handbook - GOV.UK (www.gov.uk)</a>	Identifies current national policy, guidance and supporting materials in relation to the infection prevention and control of healthcare associated infections (HCAI) and antimicrobial stewardship in order to aid in the reduction of antimicrobial resistance	Public Health England (now UK Health Security Agency)
18.05.2022	<a href="http://www.who.int">WHO Strategic Priorities on Antimicrobial Resistance</a>	This document highlights the key achievements and next steps of the WHO Antimicrobial Resistance Division at Headquarters, Geneva.	World Health Organization
22.04.2016	<a href="http://www.nice.org.uk">Overview   Antimicrobial stewardship   Quality standards   NICE</a>	This quality standard covers the effective use of antimicrobials (antibacterial, antiviral, antifungal and antiparasitic medicines) to reduce the emergence of antimicrobial resistance	National Institute for Health and Care Excellence
23.01.2024	<a href="http://www.nice.org.uk">Overview   Neonatal infection   Quality standards   NICE</a>	This quality standard covers preventing infection in newborn babies, treating pregnant women whose babies are at risk of infection, and treating newborn babies with suspected or	National Institute for Health and Care Excellence

		confirmed infection. It includes when to give antibiotics to prevent and treat neonatal infection. It describes high-quality care in priority areas for improvement	
2020	<a href="#">FGDP(UK) and FDS publish antimicrobial prescribing guidelines for all dentists — Royal College of Surgeons (rcseng.ac.uk)</a>	The aim of this guidance is to help healthcare prescribers understand the role of antimicrobial agents in management of oral and dental infections. The guidance also aims to help rationalise and improve standards of antimicrobial prescribing within dentistry and to improve patient care.	Faculty of General Dental Practice (UK) and Faculty of Dental Surgery
March 2018	<a href="#">Treatment of infections caused by multidrug-resistant Gram-negative bacteria: report of the British Society for Antimicrobial Chemotherapy/Healthcare Infection Society/British Infection Association Joint Working Party†   Journal of Antimicrobial Chemotherapy   Oxford Academic (oup.com)</a>	Advises on the treatment of infections caused by MDR Gram-negative bacteria. It also describes best practice in antimicrobial prescribing.	Joint working party of the British Society for Antimicrobial Chemotherapy, Healthcare Infection Society and British Infection Association
November 2016	<a href="#">Prevention and control of multi-drug-resistant Gram-negative bacteria: recommendations from a Joint Working Party - Journal of Hospital Infection</a>	Guidance on screening (testing), treatment and precautions needed to prevent the spread of MDR Gram-negative bacteria. The guidance describes appropriate infection prevention and control precautions to include hand hygiene, equipment and environmental cleaning and guidance on screening for MDR Gram-negative bacteria.	Journal of Hospital Infection working party
May 2023	<a href="#">AMR local indicators</a>	AMR local indicators are publicly available data intended to raise awareness of antibiotic prescribing, AMR, HCAI, IPC and AMS; and to facilitate the development of local action plans.	UK Healthy Security Agency – Office for Health Improvement and Disparities

## 2. General IPC

Date	Title	Summary description	Author/owner
17.04.2014	<a href="#">Overview   Infection prevention and control   Quality standards   NICE</a>	This quality standard covers preventing and controlling infection in adults, young people and children receiving healthcare in primary, community and secondary care settings. It includes preventing healthcare-associated infections that develop because of treatment or from being in a healthcare setting. It describes high-quality care in priority areas for improvement.	National Institute for Health and Care Excellence
01.11.2016	<a href="#">WHO guidelines on core components of infection prevention &amp; control programmes at the national and acute health care facility level</a>	These new guidelines on the core components of IPC programmes at the national and facility level will enhance the capacity of Member States to develop and implement effective technical and behaviour modifying interventions. They are also intended to support countries in the development of their own national protocols for IPC and AMR action plans and to support health care facilities as they develop or strengthen their own approaches to IPC.	World Health Organization
18.11.2019	<a href="#">Minimum requirements for infection prevention and control programmes.</a>	The purpose of this document is to present and promote the minimum requirements for IPC programmes at the national and health care facility level, identified by expert consensus according to available evidence and in the context of the WHO core components.	World Health Organization

28.04.2022	<a href="https://legislation.gov.uk">Health and Care Act 2022 (legislation.gov.uk)</a>	An Act to make provision about health and social care.	UK Government
13.12.2022	<a href="#">Health and Social Care Act 2008: code of practice on the prevention and control of infections and related guidance</a>	This document sets out the code of practice (the code) on the prevention and control of infections under the Health and Social Care Act 2008 (H&SCA 2008). This act sets out the overall framework for the regulation of health and adult social care activities by the Care Quality Commission (CQC). It will apply to registered providers of all health and adult social care in England.	Department of Health and Social Care
25.05.2022	<a href="#">Global Strategy on Infection Prevention and Control</a>	Draft resolution proposed by Bosnia and Herzegovina, Botswana, Colombia, Jordan, Kenya, Kingdom of Saudi Arabia, Lebanon, Norway, Oman, Philippines, Qatar, United Arab Emirates, United States of America and Vanuatu.	World Health Organization
20.06.2022	<a href="#">Standard precautions for the prevention and control of infections: aide-memoire</a>	This aide-memoire presents a concise overview of important advice for implementation of standard precautions and key elements at a glance	World Health Organization
20.06.2022	<a href="#">Transmission-based precautions for the prevention and control of infections: aide-memoire</a>	This aide-memoire provides important advice for implementation of transmission based precautions and key elements on TBP in health care.	World Health Organization
13.12.2022	<a href="#">Health and Social Care Act 2008: code of practice on the prevention and control of infections and related guidance</a>	This document sets out the code of practice (the code) on the prevention and control of infections under the Health and Social Care Act 2008	Department of Health and Social Care

		(H&SCA 2008). This act sets out the overall framework for the regulation of health and adult social care activities by the Care Quality Commission (CQC). It will apply to registered providers of all health and adult social care in England.	
13.06.2022	<a href="https://www.scot.nhs.uk">National Infection Prevention and Control Manual: Addendum for Infection Prevention and Control within Neonatal Settings (NNU) (scot.nhs.uk)</a>	This addendum provides additional guidance to chapters 1,2 and 3 of the NIPCM (Scotland) specific to NNUs including, placement of neonates/assessment of infection risk, management of healthcare infection incidents, outbreaks and data exceedances, and personal care of neonates.	National Services Scotland

### 3. Aseptic technique

Date	Title	Summary description	Author/owner
04.02.2021	<a href="https://www.rcn.org.uk">Understanding Aseptic Technique   Royal College of Nursing (rcn.org.uk)</a>	Aseptic technique is recognised as an essential component of all infection prevention programmes but terminology used to define it varies. This publication is an RCN investigation into clinical views to guide the practice of aseptic technique. BD have funded this report. BD has had no influence on, or involvement in its content.	Royal College of Nursing

01.01.2014	<a href="#">epic3: National evidence-based guidelines for preventing healthcare associated infections in NHS hospitals in England</a>	This second update provides systematically developed, evidence-based broad statements (principles) of good practice for the preventions of HCAI in hospitals. This guideline includes recommendations on asepsis.	Journal of Hospital Infection
------------	---	---	-------------------------------

## 4. Preventing infections associated with vascular access devices

Date	Title	Summary description	Author/owner
01.01.2014	<a href="#">epic3: National evidence-based guidelines for preventing healthcare associated infections in NHS hospitals in England</a>	This second update provides systematically developed, evidence-based broad statements (principles) of good practice for the preventions of HCAI in hospitals. This guideline includes recommendations for preventing infections associated with the use of intravascular access devices.	Journal of Hospital Infection

## 5. Preventing urinary tract infections

Date	Title	Summary description	Author/owner
23.11.2018	<a href="#">Overview   Urinary tract infection (catheter-associated): antimicrobial prescribing   Guidance   NICE</a>	This guideline sets out an antimicrobial prescribing strategy for catheter-associated urinary tract infection in children, young people and adults. It aims to optimise antibiotic use and reduce antibiotic resistance.	National Institute for Health and Care Excellence
31.10.2018	<a href="#">Overview   Urinary tract infection (recurrent): antimicrobial prescribing   Guidance   NICE</a>	This guideline sets out an antimicrobial prescribing strategy for preventing recurrent urinary tract infections in children, young people and adults who do not	National Institute for Health and Care Excellence

		have a catheter. It aims to optimise antibiotic use and reduce antibiotic resistance.	
31.10.2018	<a href="#">Overview   Urinary tract infection (lower): antimicrobial prescribing   Guidance   NICE</a>	This guideline sets out an antimicrobial prescribing strategy for lower urinary tract infection (also called cystitis) in children, young people and adults who do not have a catheter. It aims to optimise antibiotic use and reduce antibiotic resistance.	National Institute for Health and Care Excellence
27.07.2022	<a href="#">Overview   Urinary tract infection in under 16s: diagnosis and management   Guidance   NICE</a>	This guideline covers diagnosing and managing first or recurrent upper or lower urinary tract infections in infants, children and young people. It aims to achieve more consistent clinical practice, based on accurate diagnosis and effective management.	National Institute for Health and Care Excellence
27.07/2022	<a href="#">Overview   Urinary tract infection in children and young people   Quality standards   NICE</a>	This quality standard covers diagnosing and managing urinary tract infection in infants, children and young people (under 16). It includes new and recurrent infections of the upper or lower urinary tract. It describes high-quality care in priority areas for improvement.	National Institute for Health and Care Excellence
11.06.2015	<a href="#">Overview   Urinary tract infections in adults   Quality standards   NICE</a>	This quality standard covers diagnosing and managing urinary tract infection in adults (aged 16 and over), including adults using urinary catheters. It includes assessment, antibiotic treatment and referral for specialist assessment. It describes high-quality care in priority areas for improvement.	National Institute for Health and Care Excellence
18.09.2013	<a href="#">Overview   Lower urinary tract symptoms in men   Quality standards   NICE</a>	This quality standard covers diagnosing and managing lower urinary tract symptoms in men (aged 18 and over). It describes high-quality care in priority areas for improvement.	National Institute for Health and Care Excellence

19.10.2020	<a href="http://www.gov.uk">Urinary tract infection: diagnostic tools for primary care - GOV.UK (www.gov.uk)</a>	Quick reference materials for primary care to provide a simple, effective, economical and empirical approach to the diagnosis of urinary tract infections and minimise the risk of treatment failure and emergence of antibiotic resistance so improving safe care.	Public Health England (now UK Health Security Agency)
01.01.2014	<a href="#">epic3: National evidence-based guidelines for preventing healthcare associated infections in NHS hospitals in England</a>	This second update provides systematically developed, evidence-based broad statements (principles) of good practice for the preventions of HCAI in hospitals. This guideline includes recommendations for preventing infections associated with the use of short-term indwelling urethral catheters.	Journal of Hospital Infection
-	<a href="#">NHS England » Urinary catheter tools</a>	The urinary catheter tools have been developed collaboratively with national experts to support providers in delivering consistent evidence based catheter care. The use of the tools needs to be supported by strong leadership and education.	NHS England
-	<a href="#">DRIPP Urinary Catheter Resources</a>	A urinary catheter quick reference guide and summary of evidence.	Improving Device Related Infection Prevention Practice (DRIPP)

## 6. Surgical site infection

Date	Title	Summary description	Author/owner
19.08.2020	<a href="#">Overview   Surgical site infections: prevention and treatment   Guidance   NICE</a>	This guideline covers preventing and treating surgical site infections in adults, young people and children who are having a	National Institute for Health and Care Excellence

		surgical procedure involving a cut through the skin. It focuses on methods used before, during and after surgery to minimise the risk of infection.	
01.12.2018 (New link)	<a href="#">Global guidelines for the prevention of surgical site infection (who.int)</a>	Guidance for the prevention of SSI based 28 systematic reviews of the evidence. Includes a list of 29 concrete recommendations on 23 topics for the prevention of SSI in the pre-, intra and postoperative periods.	World Health Organization

## 7. Respiratory infections (including pneumonia)

Date	Title	Summary description	Author/owner
16.09.2019	<a href="#">Overview   Pneumonia (community-acquired): antimicrobial prescribing   Guidance   NICE</a>	This guideline sets out an antimicrobial prescribing strategy for community-acquired pneumonia. It aims to optimise antibiotic use and reduce antibiotic resistance.	National Institute for Health and Care Excellence
16.09.2019	<a href="#">Overview   Pneumonia (hospital-acquired): antimicrobial prescribing   Guidance   NICE</a>	This guideline sets out an antimicrobial prescribing strategy for hospital-acquired pneumonia. It does not cover ventilator-associated pneumonia. It aims to optimise antibiotic use and reduce antibiotic resistance.	National Institute for Health and Care Excellence
31.10.2023	<a href="#">Overview   Pneumonia in adults: diagnosis and management   Guidance   NICE</a>	This guideline was developed before the COVID-19 pandemic. It covers diagnosing and managing pneumonia in adults who do not have COVID-19. It aims to improve accurate assessment and diagnosis of pneumonia to help guide antibiotic prescribing and ensure that people receive the right treatment.	National Institute for Health and Care Excellence
21.03.2024	<a href="#">National guidance for the management of children in</a>	These recommendations on the management of children in hospital with viral respiratory	Royal College of Paediatrics and Child Health

	<a href="#">hospital with viral respiratory tract infections (2022)</a>	<p>tract infections in hospital settings are for clinicians to support planning in partnership with local infection prevention control teams.</p> <p>While some recommendations describe organisational structures in England, services in the devolved nations are encouraged to adopt them to fit local models.</p> <p>This guidance is supported by the Infection Prevention Society.</p>	
11.01.2023	<a href="#">XBB.1.5 Rapid risk assessment</a>	Rapid risk assessment by the WHO's Technical Advisory Group on Virus Evolution (TAG-VE) of the public health risk associated with this variant.	World Health Organization

## 8. Health technical memoranda/Health building notes

Date	Title	Summary description	Author/owner
26.01.2024	<a href="#">NHS England » (HTM 00) Building engineering in the health sector</a>	<p>HTM 00 provides guidance on the design, installation and operation of a healthcare facility from an engineering and environmental perspective.</p> <p>HTM 00 is not intended to cover every possible scenario, for example where a patient is receiving treatment in their own home. This 2014 edition supersedes all previous versions of HTM 00.</p>	Department for Health and Social Care
26.01.2024	<a href="#">NHS England » (HTM 03-01) Specialised ventilation for healthcare buildings</a>	<p>These documents give comprehensive advice and guidance on the legal requirements, design implications, maintenance and operation of specialised</p>	Department for Health and Social Care

		<p>ventilation in healthcare premises providing acute care. In other types of healthcare a risk assessment of the nature of the treatment being delivered, condition of the patients and intensity of use needs to be undertaken by those responsible for the facility in order to determine the extent to which this guidance will be applicable. Health Technical Memorandum 03-01 (2021) supersedes all previous versions of Health Technical Memorandum 03-01 – ‘Specialised ventilation in healthcare premises’ (2007). It also supersedes HTM 2025 (1994) and DV4 (1983)</p>	
26.01.2024	<p><a href="#">NHS England » (HTM 04-01) Safe water in healthcare premises</a></p>	<p>This Health Technical Memorandum (HTM) gives guidance on the legal requirements, design applications, maintenance and operation of hot and cold water supply, storage and distribution systems in all types of healthcare premises. The guidance is for: healthcare management water safety groups design engineers estate managers operations managers contractors supply chain businesses It also provides advice and guidance on the control and management of the risk posed by Legionella, Pseudomonas aeruginosa and other water borne pathogens within a healthcare setting.</p>	<p>Department for Health and Social Care</p>
26.01.2024	<p><a href="#">NHS England » (HTM 07-01) Management and disposal of healthcare waste</a></p>	<p>HTM 07-01 details the environmental benefits of the safe management and disposal of healthcare waste, It also presents opportunities for cost savings, safer working practices and reducing carbon</p>	<p>Department of Health and Social Care</p>

		emissions related to the management of waste.	
26.01.2024	<a href="#">NHS England » (HTM 01-01) Decontamination of surgical instruments</a>	Health Technical Memorandum (HTM) 01-01 explains the management of decontamination and the various ways to sterilize reusable medical devices used in acute care.	Department for Health and Social Care
26.01.2024	<a href="#">NHS England » (HTM 01-04) Decontamination of linen for health and social care</a>	Health Technical Memorandum (HTM) 01-04 gives guidance for those who process linen used in health and adult social care settings, such as: <ul style="list-style-type: none"> <li>• laundries</li> <li>• launderette operators</li> <li>• linen processors</li> </ul>	Department for Health and Social Care
26.01.2024	<a href="#">NHS England » (HTM 01-05) Decontamination in primary care dental practices</a>	HTM 01-05 is intended to raise the quality of decontamination work in primary care dental services by covering the decontamination of reusable instruments within dental facilities.	Department for Health and Social Care
26.01.2024	<a href="#">NHS England » (HTM 01-06) Management and decontamination of flexible endoscopes</a>	Health Technical Memorandum (HTM) 01-06 provides information on the management and decontamination of flexible endoscopes. <p>The guidance consists of 5 parts:</p> <ul style="list-style-type: none"> <li>• policy and management</li> <li>• design and installation</li> <li>• operational management</li> <li>• validation and verification (including storage/drying cabinets)</li> <li>• testing methods</li> </ul>	Department for Health and Social Care
30.01.2024	<a href="#">NHS England » (HBN 00-09) Infection control in the built environment</a>	This building note details each stage of a project, from initial concept through to post-project evaluation, in relation to infection control. A building's design can help infection	Department of Health and Social Care

		prevention and control by providing an environment that is easy to clean and maintain. It is important that these features are designed into a project from the beginning.	
31.01.2024	<a href="#">NHS England » (HBN 00-10) Design for flooring, walls, ceilings, sanitary ware and windows</a>	HBN 00-10 part A to D: includes guidance on flooring, walls and ceilings, sanitary assemblies and windows in healthcare facilities. These documents outline the policy and performance requirements for flooring, walls, ceilings, sanitary assemblies and windows used in healthcare facilities.	NHS England
26.01.2024	<a href="#">NHS England » (HTM 07-01) Management and disposal of healthcare waste</a>	HTM 07-01 details the environmental benefits of the safe management and disposal of healthcare waste, It also presents opportunities for cost savings, safer working practices and reducing carbon emissions related to the management of waste.	Department of Health and Social Care
13.11.2023	<a href="#">Health Building Note 16-01: Facilities for mortuaries, including body stores and post-mortem services</a>	This publication has been produced for use by NHS Trusts and Foundation Trusts. However, it has been designed to be useful for other organisations involved in the operation, planning or use of mortuary and post-mortem facilities in England, for either joint/shared service or individual organisation use. This publication replaces HBN 20 – ‘Facilities for mortuary and post-mortem room services’ (2005).	NHS England

## 9. Hand hygiene

Date	Title	Summary description	Author/owner
------	-------	---------------------	--------------

15.01.2009	<a href="#">WHO guidelines on hand hygiene in health care</a>	The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants.	World Health Organization
05.05.2012	<a href="#">Hand hygiene in outpatient and home-based care and long-term care facilities: a guide to the application of the WHO multimodal hand hygiene improvement strategy and the “My Five Moments For Hand Hygiene” approach</a>	The scope of this document is to address practical aspects related to the performance of routine hand hygiene while providing outpatient care.	World Health Organization
09.02.2009	<a href="#">A guide to the implementation of the WHO multimodal hand hygiene improvement strategy</a>	This guide to implementation has been developed to assist health-care facilities to implement improvements in hand hygiene in accordance with the WHO Guidelines on Hand Hygiene in Health Care.	World Health Organization
-	<a href="#">Skin at work</a>	Work-related skin disease (eg dermatitis) can affect people in a wide range of occupations. This site shows how the APC approach (avoid, protect, check) can reduce the chances of suffering painful and sometimes debilitating skin conditions.	Health and Safety Executive

## 10. Personal protective equipment

Date	Title	Summary description	Author/owner
-	<a href="https://www.hse.gov.uk">Personal protective equipment (PPE) at work (hse.gov.uk)</a>	Resources to support managing risks using PPE, selection and use, maintenance, using the right type of PPE, and product safety and supply.	Health and Safety Executive
-	<a href="https://www.hse.gov.uk">Respiratory protective equipment (RPE) (hse.gov.uk)</a>	This website provides information and tools to help employers select and manage the use of respiratory protective equipment (RPE) in the workplace. The information is applicable to disposable and reusable masks, breathing apparatus and powered respirators.	Health and Safety Executive
2013	<a href="https://www.hse.gov.uk">Respiratory protective equipment at work: A practical guide (hse.gov.uk)</a>	<p>This fourth edition provides essential guidance on why respiratory protective equipment (RPE) should be used, what the law says and how to select RPE that is adequate and suitable. It also includes a useful dos and don'ts list for the management and supervision of RPE use.</p> <p>The guidance is aimed principally at employers and the self-employed who wear, or are responsible for workers who wear, RPE. It will also be useful for health and safety specialists, manufacturers and suppliers of RPE.</p> <p>It has been prepared in consultation with industry and updates the 2005 edition.</p>	Health and Safety Executive
-	<a href="https://www.rcn.org.uk">Glove Awareness Week Resources   Royal College of Nursing (rcn.org.uk)</a>	Resources for use in the workplace and online to raise awareness of appropriate glove use.	Royal College of Nursing

## 11. Safe management of patient care equipment and the care environment

Date	Title	Summary description	Author/owner
01.07.2023	<a href="https://www.gov.uk">Off-label use of a medical device – GOV.UK (www.gov.uk)</a>	Guidance on the off-label use of medical devices in Great Britain (England, Wales and Scotland).	Medicines and Healthcare products Regulatory Agency
