

Step-by-step guide: remote oral health check-in outcomes

High risk

Reinforcement of key prevention messages;
Tailored oral health and dietary advice
Ensure mouthcare plan is in place
Address concerns identified
Arrange face-to-face oral health assessment as soon as possible

Arrange face-to-face visit in primary care as soon as possible and consider onward referral to secondary/ tertiary care as per treatment required and child and young person complexity

Medium risk

Reinforcement of key prevention messages;
Tailored oral health and dietary advice
Ensure mouthcare plan is in place
Address concerns identified
Arrange face-to-face oral health assessment with sooner recall interval

Complexity of child and young person to be assessed + onward referral to appropriate dental setting

Low risk

Reinforcement of key prevention messages;
Tailored oral health and dietary advice
Agree arrangements for next dental review (likely remotely)

Arrange remote oral health check-in at an appropriate recall interval
