

National dose banding table – talquetamab (40mg/mL)

Vial size of drug	40mg/1mL	Drug	talquetamab
-------------------	----------	------	-------------

Master bands and ranges

This table is intended to be in a format useful for electronic prescribing systems.

Use To (A) if your system will round **up** for doses on the step between two bands.

Use To (B) if your system will round **down** for doses on the step between two bands.

Upper and lower limits of the dose banding table do not imply absolute maximum or minimum doses, or endorse dose capping. Refer to the summary of product characteristics (SmPC) for information regarding dose limits and particulars for preparation.

Please note that the 120mg band dose incorporates the 128mg dose from the SmPC.

Each talquetamab table, 2mg/mL and 40mg/mL, should be implemented separately according to their dosing schedule.

This table must be used for the 0.4mg/kg and 0.8mg/kg doses.
